Objective

I would always be ready for an opportunity that would help me develop my skills and flourish in my chosen career. I am passionate about new learnings.

Skills

Programming Language: C, Java, HTML, CSS, JavaScript, SQL

Frameworks & Technology: Angular, Node.js, Express.js, MongoDB (MEAN stack)

Developer Tools: GIT, GitHub, MySQL, Postman

Interpersonal: Communication, Teamwork, Leadership, Decision making

Education

B.E. in Computer Engineering

Sardar Vallabhbhai Patel Institute of Technology, Vasad (GTU)

2020-2024

CGPA: 9.15/10

CPI: 9.40/10

HSC (GSEB)

Unique School of Science, Nadiad

2020

Percentage: 73.2%

SSC (CBSE)

Bhartiya Vidya Bhavan, Nadiad

2018

Percentage: 97.2%

Work Experience

InnovateMR, Ahmedabad

June 2024 – Nov 2025

Software Engineer

- Developing, making improvements, solving bugs, and enhancing in the live project using the MEAN stack (MongoDB, Express.js, Angular, Node.js).
- Implemented REST APIs, applied agile methodologies, participating in sprints and daily scrum meeting to ensure continuous delivery and improvement.
- Collaborated with a cross-functional team to design, develop, and deploy scalable web applications.

InnovateMR, Ahmedabad

Jan 2024 – May 2024

Software Engineer Intern

- Gained hands-on experience with the MEAN stack by learning and applying it under team guidance.
- Successfully completed tasks assigned by the development team, including building features, fixing bugs, and improving existing functionalities.
- Built foundational understanding of RESTful API design, MVC architecture, and agile software development with senior engineers.
- Worked closely with senior developers to understand project architecture, coding standards.

Project Work

Food-Donation-System: HTML, CSS, JavaScript, PHP

Developed a user-friendly platform for food donors.

- Build a responsive UI using HTML, CSS, and JavaScript.
- PHP used for form handling and collecting user data using XAMPP.
- The project is dedicated to collecting surplus food and distributing it to those in need and reducing food wastage in our community.

Personal Fitness Tracker: Angular, Node.js, Express.js, MongoDB

A powerful and feature-rich Personal Fitness Tracker.

- Developed a web application for tracking personal fitness activities using MEAN stack technologies.
- The application enables users to log workouts, view a list of activities, and see statistics on their fitness routine.
- Add, delete, update and view workout entries with categories like Cardio, Strength, Yoga, etc.
- Track intensity levels (High, Medium, Low) and view total/average workout durations.
- Implemented user authentication and authorization using Express.js with the help of JWT.

Certifications

- Participated in Hack This Fall 2.0 which was a virtual hackathon.
- GoogleCloudReady Facilitator Program.
- Participated in Microsoft AI classroom series.
